COOK INLET SEA ICE ANALYSIS

**Part 1 - Mission Connection**

**1. Product/Service Description:**

The Cook Inlet Sea Ice Analysis is a hand-drawn graphic depicting sea ice locations, concentrations, and thickness in Cook Inlet.

**2. Purpose/Intended Use:**

The Cook Inlet Sea Ice Analysis is issued routinely three times per week to aid ships navigating the ice-covered waters of Cook Inlet and into the Port of Anchorage. The information is critical for vessels in planning a safe route through waters routinely impacted by sea ice movement. This product is intended to provide information to assist in the protection of life and property and enhance the nations economy.

**3. Audience:**

The target audience for the product includes: all vessels working in or traveling through Cook Inlet; climate research scientists; military and government agencies; and private consulting meteorologists and oceanographers.

**4. Presentation Format:**

This is a hand-drawn graphical product presented in portable network graphics (png) format for distribution via Marine Radio Facsimile broadcast and in Compuserve Graphics Interface (gif) format for distribution via the Internet.

**5. Feedback Method:**

The Internet web page containing the Alaska suite of ocean ice service products specifically requests comments and provides telephone numbers and an E-Mail address for the ice forecaster at the Weather Forecast Office (WFO) in Anchorage. The Radio Facsimile broadcast schedule contains a Request for Comments product that is designed to solicit feedback and provides mariners with contact information for the Meteorologist in Charge at WFO Anchorage. Feedback on this product is also obtained at Focus Group meetings, from Boat Shows, and Customer Surveys.

Technical and policy questions, and comments for the Alaska Region Cook Inlet Sea Ice Analysis may be addressed to:

National Weather Service  
Attn: Brian LaMarre W/OS21  
Marine Program Manager  
1325 East-West Highway, Room 13118  
Silver Spring, MD 20910-3285

or e-mail questions and comments to: [Brian.Lamarre@noaa.gov](mailto:Brian.Lamarre@noaa.gov)

## Part 2 - Technical

### 1. **Format and Science Basis:**

The Cook Inlet Sea Ice Analysis is a hand-drawn graphic depicting the location of the sea ice edge, shorefast ice, and open water in Cook Inlet. Sea ice concentration and thickness is also indicated in terms of specified intervals in inches and centimeters.

Coordination with the National Ice Center is done by the issuing office to ensure the products are consistent and compatible.

### 2. **Availability:**

The Cook Inlet Sea Ice Analysis is disseminated routinely three times per week by WFO Anchorage. The product is temporarily suspended each year during the warm season, once Cook Inlet is ice-free. The product is made available via various means of dissemination such as: the Internet, File Transfer Protocol (ftp) E-Mail, and Marine Radio Facsimile Broadcast. Additional information on Marine and Coastal product dissemination is available at:

<http://www.nws.noaa.gov/om/marine/home.htm>.

### 3. **Additional Information:**

Marine and Coastal Services policies, areas of responsibility, abbreviations and definitions, standards and guidelines, dissemination methods, and product specifications for Ocean Sea Ice Services are documented in NWS Instructions 10-301 to 10-304 and 10-330. These documents are made available on the Internet at:

[http://www.nws.noaa.gov/directives/010/operation\\_services.htm](http://www.nws.noaa.gov/directives/010/operation_services.htm).
